

Childhood Lead Poisoning Prevention Questionnaire

In order to improve our services, it is important for us to understand what parents and parents-to-be know about lead poisoning. Please answer the following questions the best that you can. Do not worry if you don't know the answer. Your home-visitor will be happy to answer any questions you were uncertain about after you complete the questionnaire. In addition, we would like to ask you a few questions about your living situation. Any information you provide is completely voluntary and confidential.

Thanks for your help!

Please circle whether you think each statement is true, false, or if you don't know.
